

Injection Machine Remanufacturing

Quality • Performance • Reliability

Cleveland Tool and Machine (CTM) has been producing high quality wax injection and ceramic machinery for investment casters for a number of years. CTM also offers an alternative to new machinery.

Many businesses need better machinery, but due to financial constraints, need to be more conservative in spending. A great alternative is to rebuild older units and extend their life.

Bring New Life to Your Old Machines with Remanufacturing*

Machines are stripped of old components, cleaned, repainted and new injection and electrical control systems are added. CTM tests, ships and includes a 1 year warranty.

Example

“Customer A” had a 25+ year old 50 ton Tempcraft machine with shuttle table. CTM installed new electronics; a new, CTM in-line injector with 30 gallon wax tank and 3-½ gallon shot size; and refurbished hydraulics.

Since remanufacturing this machine with CTM, Customer A has enjoyed no service issues.

Save As Much As 50% When Compared to a New Machine

Contact us today for a quotation to bring new life to an old machine and save you thousands of dollars. CTM can also send a technical sales person to your facility to do a complete survey and determine a progressive upgrade strategy to serve your needs and work within your budget.

*Not all machines are good candidates for this service.
