

Matrixcote[®] Concentrate

MATRIXCOTE concentrate is a non-fiber concentrate that contains latex, surfactants and biocide. It provides casters with excellent coating in holes and slots and excellent drying time.

Typical Material Properties*

Appearance	White, Milky Liquid
Solids Content (%)	30.5-31.5
pH	8.0-9.0
Specific Gravity	0.99
Density (lb./gal)	8.30

*These results are based on the testing methods, frequency and procedures of Ransom & Randolph or its approved suppliers. The levels referenced herein are only for general guidance and do not constitute a firm specification.

Storage & Handling

Matrixcote concentrate should be transported and stored at a temperature of 40°F-95°F (5°C-35°C). This material cannot be used once frozen. Translucent packages should be stored out of direct sunlight or bright light.
