Ransom & Randolph Announces Launch of a New Neycraft™ Duplicating Unit

Maumee, OH – 10/18/2023 – Ransom & Randolph has recently announced the launch of the Neycraft Multizone™ duplicating unit, which can meet the changing needs of any dental lab as workflow increases and decreases. The Neycraft Multizone duplicating unit is an innovative and user-friendly unit that offers precise and reliable operation as well as customizable programming, smart capabilities, and advanced safety features.

The Neycraft Multizone duplicating unit features smart capabilities to work with variable capacities (1, 2, or 3 gallons) of material. Instead of melting a full three gallons for a project, the user can simply input the desired level of colloid needed, leading to less waste. The unit can also monitor the hydrocolloid temperature throughout the cycle to ease into its target temperature, decreasing chances of burning.

Unlike other duplicating units, the Neycraft Multizone duplicating unit gives the user complete control, allowing the user to easily input the desired unit of temperature (°C or °F), melting temperature, idle temperature, and hold time. The Neycraft Multizone duplicating unit will run a complete cycle and return to holding temperature within 3 hours and includes a power saving feature that automatically starts/stops after reaching the desired holding temperature, extending motor life.

The Neycraft Multizone duplicating unit has advanced safety features to ensure the wellbeing of the unit, the operator, and the lab. The unit includes a safety switch in the lid that automatically turns off the mixer if the lid is raised to prevent fire, damage, and/or injury. The power input includes a detachable power cord that will not get tangled, ensuring the user can have a clean, organized workspace free from clutter.

The Neycraft Multizone duplicating unit comes preprogrammed and ready-to-use with the ability to adjust features easily. All Neycraft duplicating units and centrifugal casting machines, alongside R&R's Vulcan® burnout furnaces, are proudly made 100% in the USA.
